PROFILE

Senior React Native Developer with 5+ years of experience shipping production iOS and Android apps across utility, AI, VPN, health, food delivery, ridesharing, e-commerce, booking, marketplace, and business categories. Built and contributed to apps with 500K+ combined installs across Google Play and the App Store. Strong in React Native, TypeScript, JavaScript, Expo, bare React Native, API integration, Firebase, maps, payments, subscriptions, push notifications, real-time workflows, release management, and post-launch optimization. Comfortable writing Swift, Objective-C, Kotlin, and Java for native modules when JavaScript cannot reach the platform directly.

IMPACT SNAPSHOT

5+ years mobile experience	500K+ combined app installs	300+ freelance engagements
200K+ Period Tracker installs	150K+ Photo Sketch installs	100+ company projects contributed

MOBILE TECH STACK

Mobile: React Native, Expo and bare workflow, TypeScript, JavaScript, iOS, Android, New Architecture	Architecture: Redux Toolkit, RTK Query, Zustand, Context API, React Query, clean architecture
Native modules: Swift, Objective-C, Kotlin, Java, bridge modules, TurboModules, third-party SDK integration	Navigation and UI: React Navigation, Expo Router, Reanimated, Gesture Handler, Skia, custom animations
Backend and data: REST APIs, GraphQL, WebSockets, Firebase, Supabase, MMKV, AsyncStorage, secure storage	Quality and release: Jest, React Native Testing Library, Detox, Sentry, Crashlytics, EAS Build, Fastlane, CI/CD

KEY HIGHLIGHTS

- Shipped mobile apps with 150K+, 200K+, 80K+, 70K+, and 20K+ install milestones across utility, health, AI, VPN, and lifestyle categories.
- Led mobile delivery for multi-app ecosystems where customer, vendor, driver, restaurant, and admin experiences work together as one product.
- Built mobile products supporting revenue-critical platforms including Riderem with €237,688+ year-one revenue, Pickup with 115.16K+ CHF year-one revenue, and JJ Deliveries crossing 800K+ AUD business volume.
- Write Swift, Objective-C, Kotlin, and Java for native modules, TurboModules, VPN/network integrations, third-party SDKs, and platform-specific mobile requirements.
- Completed 300+ freelance engagements and contributed to 100+ company projects for international clients across Italy, Germany, USA, Canada, UAE, Switzerland, France, Australia, and other markets.

PROFESSIONAL EXPERIENCE

Senior React Native Developer and Mobile App Lead

Dcodax Technologies | Remote | 2021 - Present

- Lead React Native delivery for customer, vendor, driver, restaurant, booking, e-commerce, ridesharing, VPN, AI, and business products, often shipping multiple coordinated apps per project.
- Own architecture decisions, reusable component libraries, REST/GraphQL/WebSocket integrations, push notifications, maps/GPS, payments, subscriptions, analytics, and role-based mobile workflows.
- Choose Expo or bare React Native based on native module needs, maintain builds through EAS Build and Fastlane, and write Swift, Objective-C, Kotlin, or Java when custom native work is required.
- Coordinate with backend, design, QA, and product teams while acting as the technical contact for mobile delivery with international clients.

Freelance React Native Developer

Fiverr and Direct International Clients | Remote | 2019 - Present

- Completed 300+ engagements covering React Native app builds, redesigns, API integrations, performance fixes, crash fixes, Play Store/App Store publishing, and long-term feature development.
- Worked end to end with founders and product teams across scoping, architecture, UI implementation, backend integration, store submission, and post-launch iteration.
- Specialized in fast and stable mobile delivery: clean UI, Firebase/REST integrations, payment flows, maps, push notifications, subscriptions, and app release support.

Mobile App Developer

Alestra Solutions | Remote | 2021 - 2023

- Built mobile features, API-connected screens, authentication flows, dashboards, forms, lists, and customer-facing modules across Android and iOS.
- Improved app stability through crash investigation, network optimization, cleaner state handling, and device-matrix testing before release.
- Collaborated with designers and backend developers to deliver polished mobile experiences aligned with client requirements.

MOBILE ENGINEERING STRENGTHS

- Architecture: Redux Toolkit and RTK Query for medium and large apps, Zustand for lighter flows, feature-first structure, shared component libraries, and clean separation between UI, data, and business logic.
- Performance and quality: Hermes tuning, FlatList virtualization, bundle size reduction, Sentry/Crashlytics crash triage, Jest/component tests, Detox E2E flows, and release stability checks.
- Release ownership: EAS Build, Fastlane, Play Console and App Store Connect setup, screenshots, signing, TestFlight builds, staged rollouts, subscription review, post-launch monitoring, and bug-fix cycles.

PORTFOLIO

My Calendar Period Tracker

iOS | 200K+ App Store installs | Health and lifestyle

Built a polished cycle-tracking app with calendar-based flows, reminders, privacy-conscious local storage, and App Store release support. Owned architecture, UI, release preparation, and ongoing improvements.

Pencil Photo Sketch Maker

Android | 150K+ Play Store installs | AI/photo editing utility

Built a photo-to-sketch utility with image processing, smooth editing interactions, simple user flows, and monetization-ready structure. Worked across architecture, UI, Play Console release, and post-launch optimization.

Vynox VPN

Android | 80K+ Play Store installs | VPN and security

Developed a VPN utility with onboarding, server selection, secure connection states, subscription flow, and native Kotlin VPN service integration bridged into React Native.

GuardX VPN

iOS | 70K+ App Store installs | VPN and privacy

Built an iOS VPN experience with subscription screens, server selection, connection lifecycle handling, App Store deployment, and Swift-side work for native VPN/network extension requirements.

PixArt AI Art Generator / AI Photo Generator

Android and iOS | 20K+ installs | AI image generation

Built cross-platform AI image generation flows including prompt input, result gallery, credits/subscription handling, and API-backed generation. Tuned platform-specific behavior for store release.

Riderem, Multi-Vendor Food Delivery

Italy | Customer, vendor, and rider mobile apps | Maps, payments, real-time tracking

Built the mobile side of a multi-restaurant food delivery ecosystem covering customer ordering, vendor operations, rider dispatch, live tracking, notifications, and payments. The platform generated €237,688+ revenue and 9,078+ orders in year one.

Rydstop, Bid-Based Ridesharing

Canada | Customer and driver apps | Real-time GPS, bid pricing

Developed ridesharing app experiences with bid-based pricing, driver matching, live GPS streams, ride lifecycle management, and push notifications across customer and driver workflows.

WeCare / WePartner

Dubai | Multi-vendor e-commerce apps | Customer and vendor experiences

Built marketplace app flows for stores, categories, product catalogues, ordering, vendor management, and customer shopping experiences across a multi-vendor e-commerce platform.

Additional mobile work includes Pickup, JJ Deliveries, Get Out There UAE, Hoheal, Blushr, MyFood Global, FoodBuzz, CarryGo, ZMZM, delivery ecosystems, marketplace apps, booking apps, and admin-connected business mobile products.

EDUCATION

Bachelor of Software Engineering, COMSATS University Islamabad | Graduated 2021
